

Matching tire and terrain

Terrain	Recommended type	Why
Mixed	All-terrain tires	Versatile with good grip for mixed surfaces like dirt, gravel, sand, mud etc.
Soft and wet	Mud tires	Deep aggressive treads prevent clogging and improve traction.
Dry and loose	Sand tires	Paddle-like treads provide flotation and grip on soft sand.
Hard and rocky	Rock tires	Reinforced sidewalls ensure puncture resistance and durability.
Snowy or icy	Snow tires	Rubber compounds designed for winter and deep treads for more traction
