

The STARCO Flex line-up

Europe

Designed for
your journey

Say goodbye to punctures and hello to a better way to roll

Why choose our puncture proof tires?

- > The handling and performance of a pneumatic tire without any risk of punctures
- > No service, repairs or costly downtime
- > Excellent shock absorption and load capacity
- > Light-weight and non-marking
- > Up to four times more durable than a pneumatic tire
- > High-level resistance to most chemicals and wear from UV rays and ozone gas
- > Designed, engineered and manufactured in Europe from recyclable materials
- > Customisable with different colour combinations to fit your brand
- > Fully REACH compliant

Where can puncture proof tires replace pneumatic tires?

Our Flex wheels are ideal for manual handling equipment that uses tires from 4.00-8 down to 3.00-4 such as wheelbarrows, wagons, sack trucks, trolleys, line strippers and more.

PRO

Our Pro tires are optimised for demanding, professional use on smooth surfaces, but can also be operated on softer and more uneven sites.

The Flex Pro

The Flex Pro is our most heavy-duty tire optimised for heavier loads. The Flex Pro is loved for its classic wheel look and flexibility.

Depending on your needs, it can either be fitted onto your existing steel wheel or be delivered as a full assembly. For more demanding applications, the Flex Pro is matched with our in-house manufactured steel wheel with rust resistant e-coating. For lighter professional applications, the Flex Pro can be fitted onto our rust-free and dirt repellent STARCO PP wheel.

- > **Our most heavy-duty tire**
- > **Classic, robust design**
- > **Can be fitted onto your existing steel wheel**

The Flex iCore 2 Pro

The STARCO Flex iCore 2 is manufactured using 67% recycled materials. The thin and flexible outer foam reduces the risk of flat spots and underneath it lies an intelligent core of flexible ribs for superior shock absorption. A sleek and rust-free wheel and hub construction keeps out dirt and contamination and a clever hub design makes it compatible with all axle sizes.

- > **67 % recycled materials**
- > **Intelligent core for excellent shock absorption**
- > **No flat spots**
- > **Modern design**

Our Lite tires are optimised for DIY and lighter professional use on smooth surfaces and semi-rough terrain.

LITE

The Flex Lite

The STARCO Flex Lite is our classic tire for lighter use. The broad footprint protects grass and other soft surfaces, and the adaptive Flex system ensures a smooth and comfortable rolling experience. The rust-free, enclosed wheel and hub construction keeps out dirt and contamination and the clever hub design makes it compatible with all axle sizes.

- > **Smooth use on grass, pavement and concrete**
- > **Broad, protective footprint**
- > **Classic STARCO design**

The STARCO Flex iCore 2

The STARCO Flex iCore 2 is manufactured using 67% recycled materials. The thin and flexible outer foam reduces the risk of flat spots and underneath it lies an intelligent core of flexible ribs for superior shock absorption. The iCore 2 is loved for its modern, multipurpose tire design: a thin line ensures low rolling resistance on hard surfaces and a broad, protective footprint is activated on grass and other soft terrains. A sleek and rust-free wheel and hub construction keeps out dirt and contamination and a clever hub ensures compatibility with all axle sizes.

- **67 % recycled materials**
- **Intelligent core for excellent shock absorption**
- **Multipurpose footprint design**
- **No flat spots**

Manufacturing

All our Flex products are manufactured at our factory in Crewe, England. A strong culture of innovation and in-house R&D and mould manufacturing has made us one of Europe's leading polymer wheel producers and the largest manufacturer of puncture proof tires.

We produce more than 750.000 wheels per year and do joint development projects with major players in the mobility sector such as Altrad, Walsall Wheelbarrows, Haemmerlin, Topro and Hörby Bruk.

Our factory holds an impressive safety record, and all our products are fully REACH compliant, meeting European standards and legislation. This helps to protect our worker's health and the environment by minimising and eliminating the use of potentially harmful chemicals.

About KENDA

KENDA was founded in Taiwan in 1962 and is now one of the world's leading tire manufacturers operating across Asia, the US and Europe. Powered by a passion for mobility, we design and manufacture tires for your journey. We continuously work to ensure progression and to keep the world moving on tires and wheels that are fit for life. With more than 14.000 employees, 8 tire factories, 6 wheel factories, 4 technical centres and a global network of operation and distribution sites, we are proud to be a reliable partner for our customers.
