

A close-up photograph of a trailer's rear wheel and tire. The tire is black with a tread pattern and has the specification "145/80R13 78N" embossed on the sidewall. The wheel is a simple, grey, multi-hole steel design. The trailer body is light grey and has a black fender over the wheel. The background shows a paved road and a sunset sky with a bright sun low on the horizon.

Trailer & Caravan

One trusted partner for reliable
tire and wheel solutions

 **KENDA**

Keep your business moving with one trusted partner

KENDA simplifies your tire and wheel solutions by bringing everything under one roof.

From in-house manufacturing to European testing and local support, we reduce complexity, ensure compatibility, and help you move forward with confidence.

How KENDA supports your operation

Manufacturing control

Tires and wheels produced in-house for compatibility and consistency.

Fitting and distribution

Six distribution sites across Europe, including a dedicated Trailer & Caravan hub in Belgium.

Local customer care

Teams across Europe who understand your market and respond quickly.

European technical centre

Testing, documentation, and development aligned with European requirements.

Tried, tested, and trusted

Our trailer and caravan solutions are developed and tested at our **European Technical Centre** by dedicated engineering teams.

Our role is to remove uncertainty.

We ensure **performance, compliance, and durability** align with European requirements - and when reality throws a curveball, our teams adapt alongside you.

That is how we make sure our tire and wheel solutions are **fit for life**.

Research & Development

We are an active industry member

As active members of **ETRTO**, **ITMA**, and **EUWA**, our engineers work inside the forums where European tire and wheel standards are defined.

This places our development work inside the standards ecosystem from day one, so **you experience fewer surprises, better documentation and products that hold up in real use.**

We are also **active in leading industry associations** for the Trailer & Caravan segment, reflecting our commitment to quality and collaboration.

Trailer & Caravan solutions

The following pages provide a selected overview of our tire and wheel solutions for Trailer & Caravan.

A range for any need, proven across Europe

From DIY and professional applications to winter and XC use, KENDA's trailer tires are **tried, tested, and trusted** across more than a third of the European market.

KENDA KR209 KargoTrail 3G

The KENDA KR209 KargoTrail 3G is a lighter load capacity tire for single axle trailers and midrange tandem trailers. Good load capacity, air retention and fuel efficient tread design.

10"-15"

Load capacity	●●●●●
Wet grip	●●●●●
Off-road	●●●●●
Fuel efficiency	●●●●●

KENDA KR500 Winter Trailer Studdable

A true winter tire with 3PMSF rating for single axle trailers and mid-range tandem trailers. Excellent aquaplaning resistance and a studdable design for even the toughest winter conditions.

10"-15"

Durable steel wheels for any challenge

We use steel wheels for applications where durability, fitment accuracy, and long service life matter most. Developed specifically for trailer and touring caravan use, they provide a stable, dependable foundation.

- > Engineered to ETRTO standards for precise fitment and predictable performance
- > TÜV-certified, supporting safety and durability under real operating conditions
- > E-coated finish for long-term corrosion resistance, even in demanding environments
- > Designs optimised for load support, stability, and service life
- > Available in standard silver or black, with flexible custom colour options

10"-17"

Alloys where form meets function

Our alloy wheels combine functional performance with refined design for touring caravans and trailers. With a rust-free aluminium construction and significant weight reduction compared to steel wheels, they improve comfort, handling, and overall driving stability.

Alloy wheels

Standard finishes include **silver, matte black, and black polish**, offering a clean, modern look across different caravan and trailer designs.

For customers looking to stand out, **bespoke designs, colour finishes, and branded centre caps are available** without high-volume commitments.

All wheels are developed by our European engineering teams and meet **high quality standards, including TÜV certification**.

10"-15"

We understand your reality

Choosing a tire and wheel partner is a long-term decision. It affects **performance**, **supply continuity**, and how confidently you can plan ahead.

We design and manufacture both tires and wheels, giving you **one technical partner and one point of responsibility**.

Our role is to not only keep your trailers or caravans on the road. We keep your entire business moving with **reliable service, expert engineering and a deep understanding of what you need**.

Not every project needs the same approach. Some require **standardisation**. Others need a **bespoke** solution.

Our focus stays the same: to support your decisions with solutions you can rely on and **a partner you can work with**.
